

Interview program

Interview Format: The interview is conducted to assess the candidate's motivation and readiness for the program. Particular emphasis is placed on assessing the quality of their spoken English. At the beginning of the interview, the applicant must introduce themselves and briefly introduce themselves. During the interview, the applicant must explain their reasons for applying to the program and demonstrate knowledge of analytical methods (e.g., statistics, econometrics). At the end of the interview, the applicant must outline their plans after completing the program (where they plan to work, whether they plan to attend graduate school). The interview lasts 20-30 minutes.

Documents submitted through the portfolio competition will be considered.
